SUMMARY

Senior Frontend Developer with 10+ years of experience building high-performance, data-driven web applications in Fintech, E-learning, and High-Traffic domains. Expert in designing complex financial dashboards, data-entry systems, and scalable product architectures aligned with business growth goals. Skilled in optimizing platforms under heavy loads and establishing robust automation testing to guarantee flawless release stability.

EXPERIENCE

Senior Frontend Developer · Finsight — Kyiv

February 2022 – July 2026

- Engineered key user-facing analytical features for the CreditFlow platform: Bond Screener, League Tables, Portfolio Monitor, dynamic charts (New Issue Volume), and interactive dashboards.
- Developed robust full-scale data entry systems, complex tables, and high-performance forms within the internal admin platform for real-time market data ingestion.
- Stack: React, Next.js, React Context, Final Form, UIKit, Playwright, Jest, Vitest.

Frontend Developer · Betinvest — Kyiv

February 2020 – February 2022

- Developed new features and maintained core React applications for a high-traffic sports betting platform (Favbet).
- Implemented state-driven components, custom React Hooks, React Hook Form, design system libraries.

Frontend Developer · Softwarium — Kyiv

April 2019 – February 2020

- Built interactive React applications for childcare and school facility management (Vigilo).
- Used Redux, Formik, React-intl for localization.

Junior Frontend Developer · OldminTeam — Zhytomyr

May 2018 – April 2019

- Cross-platform web and mobile applications with Angular 2+, React.js, React Native.

Junior Frontend Developer · JBS Ukraine — Zhytomyr

May 2016 – May 2018

- Responsive layouts, corporate web platforms, third-party REST API integrations.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libs: React, Next.js, Angular (2+), React Native, Redux, React Context

Forms & Validation: Final Form, React Hook Form, Formik, Redux Form, TanStack Query

Styling & UI: Sass, Styled Components, CSS Modules, UIKit, Material UI, Design Systems

Testing: Playwright, Jest, Vitest

Tools: Git, Figma, Storybook, Sentry monitoring

ACHIEVEMENTS

- Transformed the free functionality of the application into a multi-level subscription, which allowed us to attract 150+ premium subscribers and increase monthly revenue from subscriptions.
 - Built high-performance tables and complex data-entry forms for reliable real-time market data ingestion.
 - Contributed to e2e testing with Playwright and unit/functional suites (Jest, Vitest), improving release stability.
 - Optimized client-side components for the high-traffic Favbet platform under heavy load.
 - Designed reusable UI components and custom React Hooks, reducing code duplication.
-
