EXPERIENCE

Senior Frontend Developer · Finsight — Kyiv

February 2022 – July 2026

- Engineered key user-facing analytical features for the CreditFlow platform: Bond Screener, League Tables, Portfolio Monitor, dynamic charts (New Issue Volume), and interactive dashboards.
- Developed robust full-scale data entry systems, complex tables, and high-performance forms within the internal admin platform for real-time market data ingestion.
- Stack: React, Next.js, React Context, Final Form, UIKit, Playwright, Jest, Vitest.

Senior Frontend Developer · Betinvest — Kyiv

February 2020 – February 2022

- Developed new features and maintained core React applications for a high-traffic sports betting platform (Favbet).
- Implemented state-driven components, custom React Hooks, React Hook Form, design system libraries.

Frontend Developer · Softwarium — Kyiv

April 2019 – February 2020

- Built interactive React applications for childcare and school facility management (Vigilo).
- Used Redux, Formik, React-intl for localization.

Junior Frontend Developer · OldminTeam — Zhytomyr

May 2018 – April 2019

- Cross-platform web and mobile applications with Angular 2+, React.js, React Native.

Junior Frontend Developer · JBS Ukraine — Zhytomyr

May 2016 – May 2018

- Responsive layouts, corporate web platforms, third-party REST API integrations.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libs: React.js, Next.js, Angular (2+), React Native, Redux, React Context, Recompose, Reselect, jQuery

Forms & Validation: Final Form, React Hook Form, Formik, Redux Form

Styling & UI: Sass, Less, Styled Components, CSS Modules, UIKit, Material UI, Bootstrap, Design Systems

Testing: Playwright, Jest, Vitest

Tools: Git, WebStorm, Figma

ACHIEVEMENTS

- Developed key analytical modules for CreditFlow (Bond Screener, League Tables, Portfolio Monitor) with interactive charts, simplifying market trend monitoring.
- Built high-performance tables and complex data-entry forms for reliable real-time market data ingestion.
- Contributed to e2e testing with Playwright and unit/functional suites (Jest, Vitest), improving release stability.
- Optimized client-side components for the high-traffic Favbet platform under heavy load.
- Designed reusable UI components and custom React Hooks, reducing code duplication.
